

August 23 – 26, 2005
Zielona Gora, Poland

Third International Conference on Engineering Rheology ICER 2005 was held from August 23, 2005 to August 26, 2005 at the University of Zielona Góra, Poland (see the website of IJAME: www.ijame.uz.zgora.pl). The conference was organized under the auspices of the Polish Society of Engineering Rheology and Committee of Chemical Engineering, Polish Academy of Science. Professor Anna Walicka was coordinating the work of the Organizing Committee of ICER 2005. She and Professor Edward Walicki were editors of the conference proceedings published in the special issue of the quarterly International Journal of Applied Mechanics and Engineering.

The Scientific Committee was composed of the distinguished representatives of the world rheology. There were over 40 participants at the conference including 28 foreign guests from 13 countries who presented 50 papers in several sessions: industrial rheology, analytical and numerical methods, rheometry and experimental methods, intelligent processing of materials. The conference aroused lively interest. Many prominent experts from all over the world (countries such as: Algeria, Austria, Belarus, France, Japan, Korea, Latvia, Morocco, Romania, Russia, Spain, Thailand, Ukraine and Poland) discussed the future directions and priorities in the field of rheology.

The conference meeting was a great occasion to share experience and knowledge with other participants, well-known experts as well as young researchers. During the conference Organizing Committee prepared rich occasional programme. On the first day banquet in exclusive restaurant with exotic plants. On next days all participants could use from many attractions like picnic on the sports airport, flying the historical aeroplane and listening a gipsy team and relaxing in salt cave.

The members of Organizing Committee of ICER 2005 are grateful to all partakers and institutions they represent and hope it will help to cooperate and find new solutions and arrange international researches in the areas of engineering rheology. The Editorial Office of IJAME has at its disposal some volumes of the conference proceedings (346 pages, softcover, 40 US\$ including postal handling).
